25X1X 1.	6 whari Chienha a bambo the riv Inside which smeltir the are and pul from 1 at the	on the north bank singwei (1696/5281/500 fence approximator and a single guthe fence was a lago to 80 men worked aglequipment. Many ea and the engines alled up the river to 2 inches thick shop. Although the	was a machine shop of the Min River is (1442). The area of tely 6 feet high. The area was arge building which is. The shop had sever motor junks were tof the junks were roank by teams of severe also taken intere was no paved rover station approximate.	in the area of Food the shop was surrely the only gate in the stationed at this housed the machine weral large lathes exial up on the river removed, placed on wen coolies. Steel to the shop. Many bad into this river	how known as ounded by e fence faced gate. shop in and some r below carts, plates of trucks arrived , paved road
2.	On 24 January there was a power station near the number 6 wharf in Foochow which had one generator with a capacity of 1,500 kilowatts. There had been two generators in this plant, but in order to make it safe from Nationalist bombings, one had been sent to Yangchung (3152/0022), where it was stored in a two story building constructed of sheet steel and with a canvas roof. The sheet steel for the construction of this storage building was taken from the oil companies near the power plant in Foochow.
